EXPERIENCE

Hotwax Commerce

Feb 2024 - Present

Software Developer

Indore, MP

- Developed **OMS** applications using **React.js**, **Redux**, and **ionic** for critical eCommerce and inventory operations.
- Delivered and reviewed **300+ pull requests** across frontend applications, contributing to feature development, bug fixes, and code quality improvements.
- Implemented **Micro Frontends** using **Webpack Module Federation**, enabling independent deployments, improved scalability, and faster application loading.
- Built offline-first inventory counting PWAs using **IndexedDB** and **Web Workers**, enabling efficient processing of **4,000+ inventory records concurrently**.
- Reduced API payload sizes by up to **40%** through request optimization and efficient data aggregation.
- Migrated client reporting workflows from **NiFi** to the **Moqui Framework** using Groovy services and XML configs, eliminating **100% dependency on NiFi** and simplifying report-processing pipelines.

ZignEx

Sep 2023 - Jan 2024

Front End Developer

Remote

- Built enterprise web applications using **Angular**, **TypeScript**, and **Tailwind CSS** for logistics optimization workflows.
- Improved geospatial and data-intensive planning tools for territory design, depot planning, route optimization, and operational decision-making.
- Extended **Wijmo** and **OpenLayers** libraries to create reusable mapping and data grid components adopted across **7+ enterprise applications**.
- Migrated a reusable library from **JavaScript** to **Angular** and **TypeScript**, improving performance by **30%** and maintainability.

PROJECTS

NutShell AI

[GitHub](#) | [Live](#)

- Built an AI-native productivity hub using **Next.js** and **Vercel AI SDK** to automate research and task planning.
- Enhanced streaming Generative UI using **React.js**, **shadcn/ui**, and **Framer Motion**, rendering dynamic LLM-generated components.
- Implemented agentic workflows for automated research, planning, and task orchestration.
- Integrated **Tavily API** and **Groq AI** to generate context-aware action plans from real-time web research.
- Leveraged **Supabase** for authentication, real-time persistence, and secure user management.

Inventory Cycle Count

[GitHub](#) | [Live](#)

- Built an offline-first inventory PWA using **Vue.js**, **ionic**, and **IndexedDB** for high-volume retail operations.
- Engineered reliable offline synchronization with device locking, heartbeats, and idempotent APIs.
- Reduced server payload sizes by **40%** through optimized requests and background aggregation.
- Optimized processing of **4,000+ records** using virtual scrolling, lazy loading, and **Pinia**.
- Integrated **MCP** servers with GitHub and Playwright to enable agent-driven automation and testing workflows.

SKILLS

Frontend: React.js, Next.js, Vue.js, Ionic, JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Python, REST APIs, GraphQL, PostgreSQL

Tools: Git, GitHub, GitHub Actions, CI/CD, Vercel, Vitest, Jira, Figma

Concepts: Redux, IndexedDB, Micro Frontends, WebSockets, Service Workers, Performance Optimization

AI & Automation: Vercel AI SDK, Claude Code, Codex, Tavily API, Agentic Workflows, MCP Servers

EDUCATION

Shri GS Institute of Technology and Science

April 2019 - May 2023

B.Tech in Computer Science

Indore, India
